

**BAV-results of observations:
Visual maxima and minima of pulsating and eruptive stars**

Pagel, Lienhard

E-Mail: publicat@bav-astro.de**BAV Mitteilungen No. 250**

March 2019

Abstract: *In this 92th compilation of BAV results of visual observations of variable stars obtained mostly in the year 2018 are presented, giving 54 maxima and 26 minima of pulsating and eruptive stars.*

We present 26 minima and 54 maxima of pulsating and eruptive stars. The results were acquired by 9 observers in Germany, Austria and France, mostly observed in the year 2018. The observations were made at private observatories.

This paper contains only unpublished observations. The types of the variable stars are taken from GCVS-catalog [3] or observer.

Please use the following link for an easy access to all the publications of the BAV [1] [2].

Explanations to the table

column 1	Variable	designation from the GCVS
column 2		constellation
column 3	Phs	phase: maximum (max) or minimum (min)
column 4	HJD 24+	heliocentric UTC timings of the observed min or max
column 5	U	if uncertain, mark „:“
column 6	Mag	magnitude
column 7	Obs	abbreviations, see table at the end of the list.
column 8	Type	type of the variable star
column 9	N	number of measurements

Number of Maxima: 54

Number of Minima: 26

Tabelle 2: Times of minima and maxima
